

Wireless Charging Pad with QC 3.0 Adapter

Compact contactless charging surface with external AC power adapter

Simple drop-and-charge power for everyday devices

A compact circular wireless charging pad supplied with an external wall adapter and power cable, intended for desktop, bedside, hospitality and furniture-integrated charging applications.

Preliminary specification prepared only from the supplied three-image package. Unstated power, electrical and dimensional values are marked TBD rather than estimated.

1. Functional Description

The Wireless Charging Pad provides a dedicated contactless charging surface for compatible mobile devices. The circular pad is connected by cable to an external AC wall adapter. The supplied imagery shows a US two-blade adapter carrying a Qualcomm Quick Charge 3.0 marking, and a phone charging directly on the upper surface of the pad.

2. Key Features

Wireless charging surface	Flat circular charging area clearly identified by a wireless charging symbol.
External power adapter	Separate wall adapter supplies power to the charging pad.
QC 3.0 adapter marking	Qualcomm Quick Charge 3.0 marking is visible on the supplied adapter.
Compact form factor	Low-profile round pad occupies minimal desktop area.
Charging indication	A small indicator point/opening is visible on the product; exact LED behavior is TBD.
Cable-powered design	A detachable cable is shown between the wall adapter and charging pad.
Device application	Supplied imagery demonstrates smartphone wireless charging.

3. Electrical Characteristics

AC input	TBD - adapter input voltage and frequency are not legible in the supplied images.
Adapter output	TBD - exact QC 3.0 output profiles are not visible on the adapter label.
Charging-pad input	TBD - exact DC voltage/current required by the pad is not stated.
Wireless output power	TBD - no verified 5 W / 10 W / 15 W or other wattage is stated in the supplied package.
Adapter technology marking	Qualcomm Quick Charge 3.0.
Wireless charging protocol	TBD - exact Qi version or other protocol is not stated.
Total system power	TBD.

4. Input / Output Summary

System input	AC mains through the supplied external wall adapter.
Power-conversion stage	External QC 3.0-marked AC/DC adapter.
Pad input	Low-voltage DC through the supplied cable; exact connector and electrical profile TBD.
Primary output	Wireless power delivered through the top circular charging surface.
Target load	Compatible wireless-charging mobile devices.

5. Mechanical Characteristics

Product shape	Circular low-profile charging pad.
Top surface	Black charging face with printed wireless charging graphic.
Perimeter	Metallic/chrome-style outer trim is visible.
Overall diameter	TBD - no dimensioned drawing or reliable scale is supplied.
Overall thickness	TBD.
Cable length	TBD.
Weight	TBD.
Installation	Free-standing desktop use is directly shown; suitability for recessed mounting requires separate mechanical confirmation.

6. Typical Applications

Office desks, conference rooms, bedside tables, hotel rooms, reception counters, lounges, home workspaces and other locations requiring a compact wireless charging point for compatible mobile devices.

7. Product Architecture

The product uses a two-stage power architecture: AC mains is converted by the external wall adapter, then low-voltage power is delivered through the cable to the circular wireless transmitter. The receiving device is charged without a direct electrical connector at the device-to-pad interface.

8. Production-Release Data Required

Before release as a controlled SiCore product specification, confirm the adapter AC input range and frequency, all QC 3.0 DC output profiles, charging-pad input voltage/current, rated wireless output power, supported wireless charging standard, operating frequency, charging efficiency, foreign-object detection, thermal/overcurrent/overvoltage protection, indicator behavior, connector type, cable length, pad diameter and thickness, enclosure materials, operating/storage temperature, product weight and applicable UL/ETL/CSA/FCC or other regional certifications.

9. Product Classification

Primary category: Wireless Charging

Product type: Desktop Wireless Charging Pad

Power architecture: External AC/DC adapter + wired transmitter pad

Adapter marking: Qualcomm Quick Charge 3.0

Document status: Preliminary English product specification based solely on the supplied images. No unsupported voltage, current, wireless wattage or dimensional values have been introduced.
